## HYDRONIC FAN COIL

The Zefiro fan coil is the product of decades of experience in the field of hydronic terminals and offers technical solutions based on all the feedback from users, installers and designers who over the years have contributed to making this a feature-packed, complete product.

Special attention has been given to ensuring easy installation, thanks to the interlocking construction of the sides of the cabinet.

The stylish design, low-noise operation, versatility, quality components and the wide range of accessories make this fan coil an excellent product for heating and cooling any residential and commercial environment. The Zefiro series is Eurovent certified and is produced in accordance with the applicable regulations on safety.

---

## EASY DRAINAGE

AUXILIARY TRAY IN ABS TILTED TO AN ANGLE TO FACILITATE CONDENSATE DRAINAGE AND PREVENT STAGNATION, INCLUDED IN THE STANDARD EQUIPMENT AND INSTALLED UNDER THE VALVES.

---

## REVERSIBLE

THE "HDP" ACCESSORY ALLOWS A VERTICAL UNIT TO BE CONVERTED FOR INSTALLATION IN THE HORIZONTAL DIRECTION.

---

## LOW-NOISE

THE USE OF AN EC MOTOR ALLOWS LOWER NOISE EMISSIONS TO BE OBTAINED COMPARED TO TRADITIONAL MOTORS, REACHING EXTREMELY LOW SOUND POWER VALUES.

---

## FUNCTIONAL CABINET

COVER CABINET WITH 2 SIDES EASILY REMOVABLE INDEPENDENTLY FROM THE REST OF THE UNIT.

---

## BMS COMPATIBLE

POSSIBILITY OF CONTROLLING UP TO 240 UNITS WITH OUR TOP3-BMS MODBUS PROTOCOL MULTIFUNCTIONAL DIGITAL THERMOSTAT, ALSO IN COMBINATION WITH ALL AERTESI TERMINAL UNITS.

---

## ADVANCED CONTROL

ADVANCED CONTROL ENABLES TO MANAGE MASTER/SLAVE COMBINATIONS OF UP TO 24 UNITS AND TO USE WALL MOUNTED OR REMOTE CONTROLS.

---

## EC MOTOR

ENERGY SAVINGS FROM 45% TO 65% COMPARED TO TRADITIONAL MOTORS - DEPENDING ON THE TYPE AND METHOD OF USE. THE EC MOTOR USED IS OF THE BRUSHLESS TYPE CONTROLLED BY A 0-10 VDC SIGNAL WITH VERY LOW POWER CONSUMPTION.

COOLING

0.6/10.7 kw

HEATING

0.6/11.7 kw

AIR FLOW

81-2211 m<sup>3</sup>/h

CONSUMPTION REDUCED UP TO

67%

## I.A.Q. PURIFICATION AND SANITIZATION SYSTEM

Aertesi makes certified technologies and devices available with demonstrated reduction capacity of the microbial load of different bacterial strains, including virucidal activity against COVID-19.

**SANI FAN** for sanitising fan-coil internal surfaces with Bioxigen® technology.

**BIOXAIR** for sanitising aeraulic ducts with Bioxigen® technology.

**FILTRASAN** fibre suitable for filtering media which retains and removes microorganisms present in the air. Sanitized technology.

## VERSIONS WITH CABINET

Vertical and horizontal with adjustable grilles.

Vertical and horizontal with front intake and front filter removal. Adjustable grilles.

## LOW ZEFIRO

LOWERED-HEIGHT VERSION

Vertical and horizontal. Adjustable grilles.

## VERSIONS WITHOUT CABINET

Vertical or horizontal recessed installation with variable intake.

IDENTIFICATION MODEL

## CCM + MPK-VF OUTER CASING AND PANEL FOR ZEFIRO VF

The CCM + MPK kit for floor installation includes a sturdy sheet metal outer casing that allows hydraulic and electrical systems to be fitted on site; the fan coil is then installed at a later stage as works progress. The installation is completed by a stylish 2 mm thick panel fixed to the outer casing. RAL colours can be customised on request for an extra fee.

## MPK-HD PANEL FOR ZEFIRO HD

External metal panel for horizontal Zefiro HD + 90° DELIVERY PLENUM (without insulation).

## AERLINK COMPLETE SUPERVISION SYSTEM VIA BROWSER

The AERLINK device allows users to manage a network consisting of up to 32 fan coils and 2 heat recoveries per each Web page.

In the case of a higher number of units, additional AERLINK devices can be used, each of them linked to their dedicated web page.

In this way the total number of fan coils that can be managed is virtually unlimited.

It's also possible to associate additional "slave" fan coils to each of the 32 fan coils connected to AERLINK, according to "Master/slave" logics. In this case the network will display the master and slave units as a unique device.

Aerlink can be also used as converter towards BMS systems that are using communication protocol BACNET/IP or BACNET MS/TP.

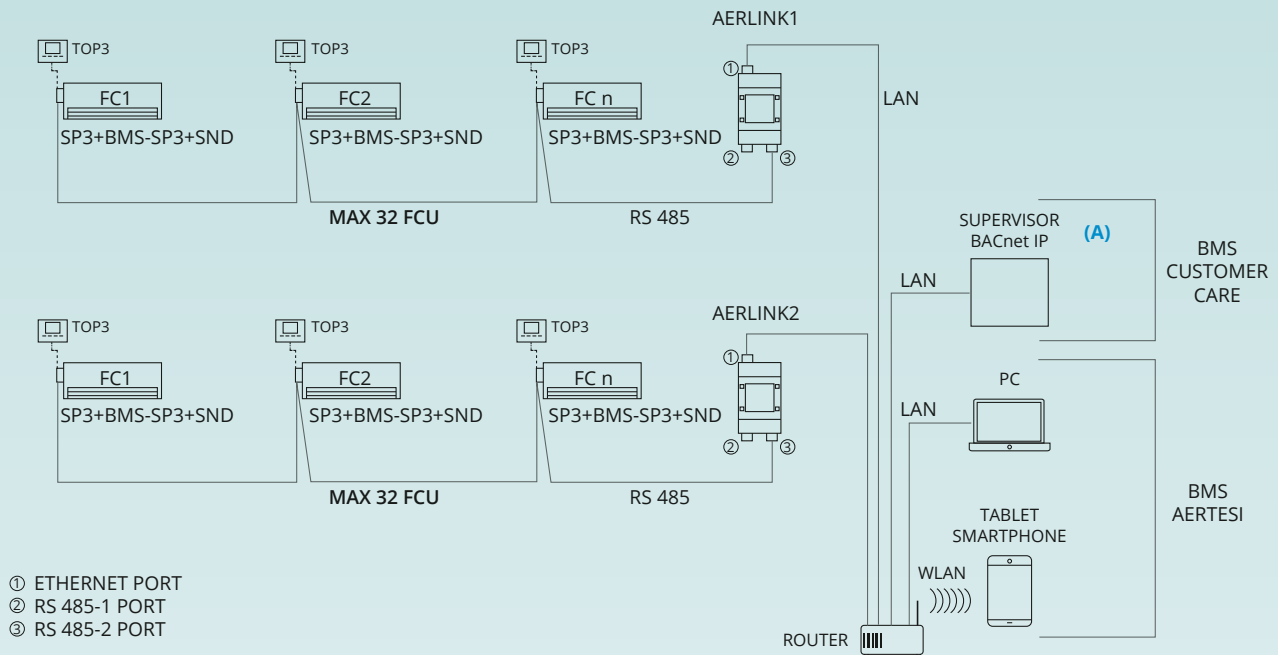

# SOLUTION FOR HOTEL - FANCOIL WITH USER KEYPAD DISPLAY:

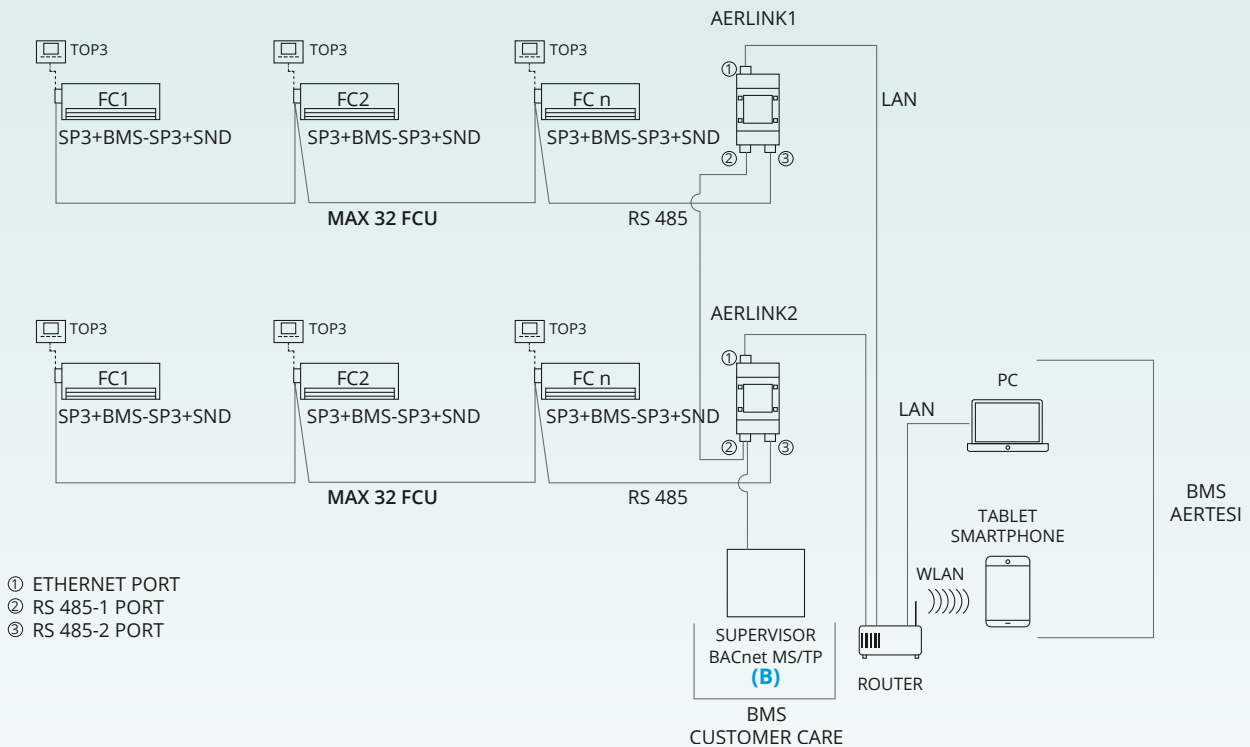

SP3 (motherboard) + BMS-SP3 (module for BMS integration) + TOP3 (keypad display) + SND (water probe)

## - CONFIGURATION FOR HOTEL 1

(A) The Customer's supervisor is connected to the LAN network by router. "Bacnet IP" means that the internet protocol and wiring is those of the LAN network.

## - CONFIGURATION FOR HOTEL 2

(B) The wiring between Aerlink and BANnet MS/TP is done by clamps connected in RS-485-1 in the door 2, whereas the fancoils are always connected, as in CONFIGURATION 1, to the RS-485-2 network, by the door 3.

# SOLUTION FOR OFFICE - FANCOIL WITHOUT USER KEYPAD DISPLAY (with the same 2 configuration above illustrated)

SP3 (motherboard) + BMS-SP3 (module for BMS integration) + SND-AIR (air probe) + SND (water probe)
