Key to symbols

Symbols on the machine

This product complies with applicable EU directives

Symbols in these Instructions for Use

Warning/Caution!

Application area

The product is a comfort module with integrated radio transmitter designed for demand-controlled climate indoors within Swegon's ventilation system WISE. The product is used to ventilate, cool and heat premises exactly as needed.

The product may not be used for anything other than its intended use.

General

Read through the entire instructions for use before you install/use the product and save the instructions for future reference. It is not permissible to make changes or modify this

product other than those specified in this document.

Contents

1 WISE Parasol Zenith

1 x Instructions for use

Protective equipment

Always use appropriate personal protective equipment for the work in question, in the form of gloves, respirators, protective glasses and helmets during handling, installation,

cleaning and service/maintenance.

Electrical safety

Permitted voltage, see Electrical data.

It is not permissible to insert foreign objects into the product's contactor connections or ventilation openings; risk for short circuiting.

24 V isolation transformer to be connected should comply with the provisions of IEC 61558-1.

Cable sizing must be carried out for cabling between the product and the power supply source.

Disconnect the power supply when working on products that are not required to run.

Always follow the local/national rules for who shall be permitted to carry out this type of electrical installation.

Handling

Always use appropriate transport and lifting devices when the product is to be handled to reduce ergonomic loads.

The product must be handled with care.

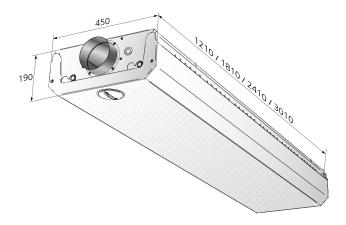

Installation

- Moist, cold and aggressive environments must be avoided.
- Assemble the product according to this instruction and applicable industry regulations.
- Install the product for easy access during service/ maintenance.
- Avoid installing the product near a heat source.
- Check to make sure that the product does not have any visible defects.
- Check that the product is properly secured after it has been installed.
- Secure cables with cable ties.
- Check that all cables are properly secured in place after installation.

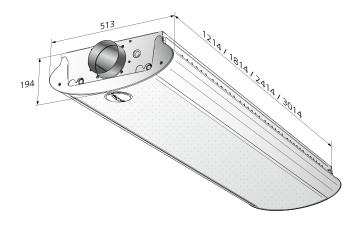

Dimensions and weight

WISE Adriatic Prisma

WISE Adriatic Ellips

Weight

Weight incl. controller, excl. valves, actuators and sensors.

| WISE Adriatic with Prisma design section | | | |
|--|------------|----------------|--------------------------|
| Length | Dry weight | Weight, filled | d with water (kg) |
| (m) | (kg) | A: Cooling | A/B: Cooling/ Heating |
| 1.2 | 20.3 | 21.3 | 21.5 |
| 1.8 | 28.9 | 30.4 | 30.8 |
| 2.4 | 37.2 | 39.3 | 39.8 |
| 3.0 | 44.9 | 47.5 | 48.2 |

Weight Weight incl. controller, excl. valves, actuators and sensors.

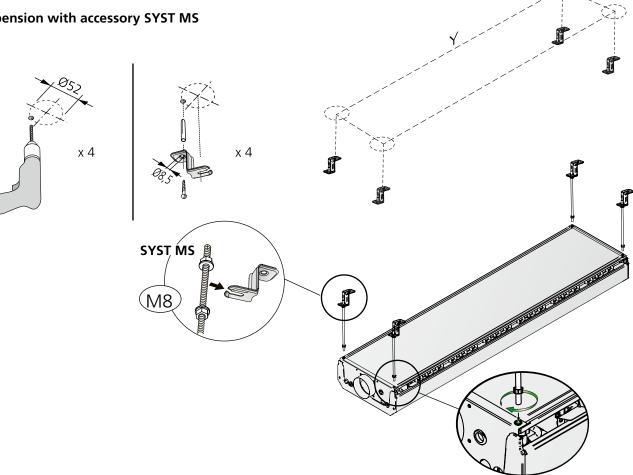

WISE Adriatic with Ellips design section

| Length | Dry weight | Weight, filled with water (kg | |
|--------|------------|-------------------------------|--------------------------|
| (m) | (kg) | A: Cooling | A/B: Cooling/ Heating |
| 1.2 | 20.6 | 21.6 | 21.9 |
| 1.8 | 29.3 | 30.8 | 31.2 |
| 2.4 | 37.3 | 39.4 | 39.9 |
| 3.0 | 45.9 | 48.5 | 49.2 |

Installation **Suspended installation**

Suspension with accessory SYST MS

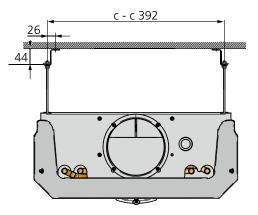

Installation

The c-c dimensions are the same for WISE Adriatic with both design module Prisma and design module Ellips. The example shows Prisma.

| ADRIATIC | Suspended installation | |
|----------|------------------------|-----------|
| Length | c-c (mm) | c-c (mm) |
| (m) | Short side | Long side |
| 1.2 | 392 | 1173 |
| 1.8 | 392 | 1773 |
| 2.4 | 392 | 2373 |
| 3.0 | 392 | 2973 |

suspended installation with assembly piece SYST MS-M8.

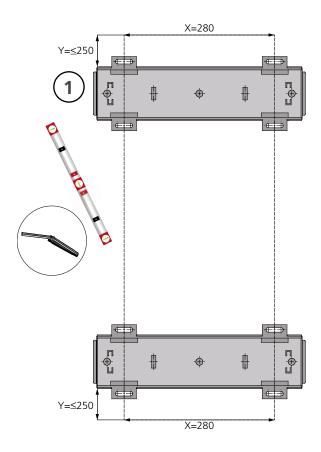

Surface mounted installation

Surface-mounting the product on the ceiling using suspension bracket SYST MD-ADRIATIC.

- 1. Carefully measure where the bracket is to be placed so that all the brackets are in a perfectly straight line in relation to each other according to the c-c table. The bracket's distance to the edge of the short side may not exceed 250 mm, in order for the safety cord to be able to be anchored.
- Install the suspension bracket SYST MD-ADRIATIC in the ceiling. Use two brackets per product for lengths 1.2 and 1.8. For lengths 2.4 and 3.0, use three brackets. Anchor the safety cord under the suspension bracket when installing the bracket. Use a suitable screw for the ceiling in question.
- 3. When all the brackets have been screwed into place with four screws each, fold out the moving sections at either end of the bracket to the out position.
- 4. Anchor the enclosed safety cord in the bracket and in the corner of the product.
- 5. Then move the product straight up against the bracket.
- 6. Lock the product in the bracket by pressing the folded out sections on the ends of the bracket in towards the product on both sides.
- 7. Repeat this procedure for all the brackets.

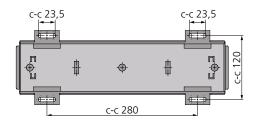

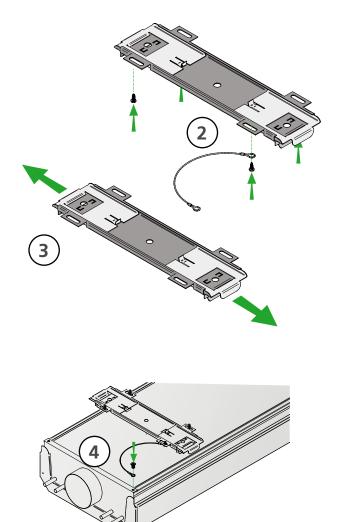

Installation

The c-c dimensions are the same for WISE Adriatic with both design module Prisma and design module Ellips. The examples below show Prisma.

| | Surface mounted installation | | |
|------|------------------------------|----------------|---------------|
| Unit | Number of brackets | c-c (mm) | Max. (mm) * |
| (m) | pcs. | X - Short side | Y - Long side |
| 1.2 | 2 | 280 | 250 |
| 1.8 | 2 | 280 | 250 |
| 2.4 | 3 | 280 | 250 |
| 3.0 | 3 | 280 | 250 |

* Max. distance from the end of the product.

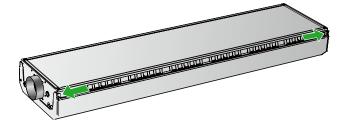

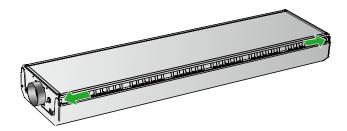

Secure design module

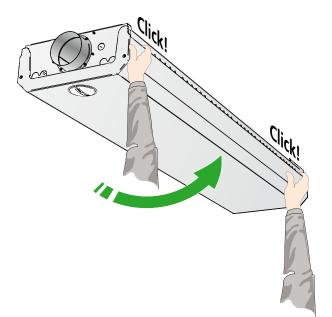

When fastening the design module from an open position, raise the design section until you hear a click, at which point it is secured in the base module.

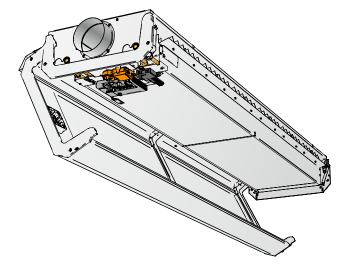

Fold down design module

The unit is equipped with a pushbutton at either end of one of the long sides, for simple lowering of the design section and access to e.g. control equipment. When lowering, one long side is opened and the design section is suspended from the opposite long side.

Water connection

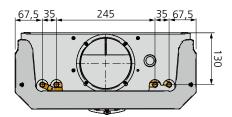

Water

Connection dimensions

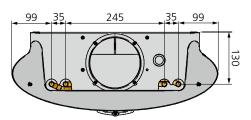

| Unit | Cooling and Heating | |
|-----------------|---------------------|--|
| (m) | Supply and return | |
| 1.2 1.8 2.4 3.0 | plain pipe ends | |
| | (Cu) Ø 12 x 1.0 mm | |

Alternative to factory-fitted valves

| Unit | Cooling and Heating |
|-----------------|---------------------|
| (m) | Return |
| 1.2 1.8 2.4 3.0 | DN15 male thread |

Dimensions WISE Adriatic Prisma, end view, water connection

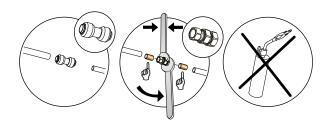

Dimensions WISE Adriatic Ellips, end view, water connection

Water connection

- A1 = Supply cooling water Ø12x1.0 mm (Cu) A2 = Return cooling water Ø12x1.0 mm (Cu) B1 = Supply heating water Ø12x1.0 mm (Cu)
- B2 = Return heating water @12x1.0 mm (Cu)

Connecting water

The water pipes are always placed on the product's short side, regardless of the air connection side of the product.

Connect the water pipes using push-on couplings or compression ring couplings when the product is ordered without valves. Note that compression ring couplings require support sleeves inside the pipes.

Do not use solder couplings to connect the water pipes. High temperatures can damage the unit's existing soldered joints.

Flexible connecting hoses for water are available for flatend pipes and valves, and can be ordered separately.

To avoid corrosion in the water circuit, the water quality in the system water must be checked regularly.

Water quality

Swegon recommends water quality according to VDI 2035-2 for both the heating and cooling systems. In order to maintain the oxygen content in the water below the levels (<0.1 mg/l) prescribed in VDI 2035-2, it is recommended to install a vacuum degasser, particularly in the cooling system where it's more challenging to dissolved gas. It is also important that the pre-pressure in the expansion vessel is dimensioned according to EN-12828 for both the heating and cooling systems and that regular checks are made of the pre-pressure. The cooling and heating systems must be designed to prevent oxygen from entering the system, this is particularly important to consider when selecting flex hose, pipes and expansion vessels.

When the system is filled with fresh water, it has an oxygen content of approximately 8 mg/l, however, this oxygen is consumed quickly through corrosion processes and within a few days the oxygen in the water should be consumed. Nevertheless, it is important to avoid filling the system with fresh water unnecessarily.

Automatic deaerators are often installed to facilitate filling of the system. It is recommended that the automatic deaerators are turned off once the system has been fully vented to avoid these drawing in air in the system if the pre-pressure in the expansion vessel should drop.

Connection dimensions

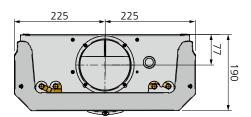

| Model | Length | Factory-fitted | Connection | Coupling type | Connection | Coupling type |
|--------------------------------|-----------|--------------------|------------|------------------------|-------------|------------------------|
| A, B, Cooling, Cooling/Heating | 1.2 - 3.0 | Actuator and valve | Return | DN15, male thread | Supply pipe | Plain pipe 12 x 1.0 mm |
| A, B, Cooling, Cooling/Heating | 1.2 - 3.0 | - | Return | Plain pipe 12 x 1.0 mm | Supply pipe | Plain pipe 12 x 1.0 mm |

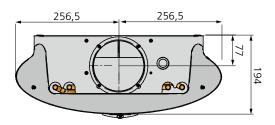

Air connection

To connect the air

WISE Adriatic comes with air connection on one short side. The sleeve is connected to the primary air duct.

Dimensions WISE Adriatic Prisma, end view, air connection

Dimensions WISE Adriatic Ellips, end view, air connection

Connection dimensions

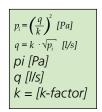

| Unit | Air connection, diameter |
|-----------------|--------------------------|
| (m) | Ø |
| 1.2 1.8 2.4 3.0 | 125 |

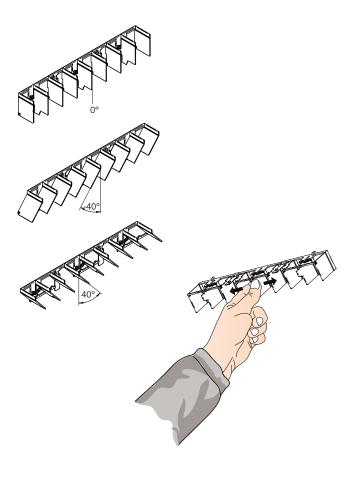

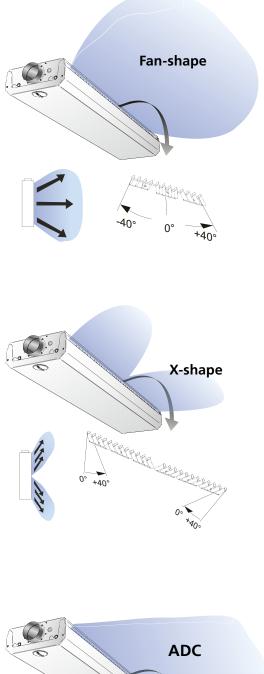

Commissioning

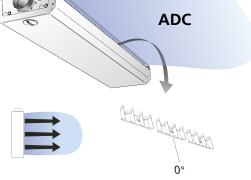

The water and air connection is always placed on the end of the product.

Measuring tubes are placed on the product's two long sides adjoining the water and air connection.

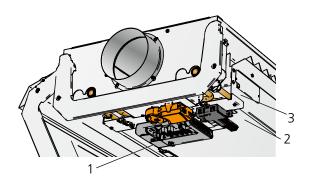

Connection

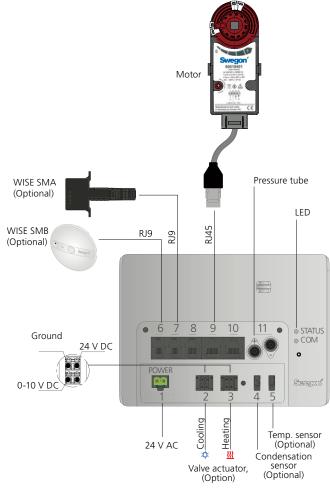

WISE Adriatic with factory-fitted components

- 1. WISE CU (Controller Unit)
- 2. Motor for integrated air damper
- 3. Sensor for measuring supply air temperature

Factory fitted components as an option

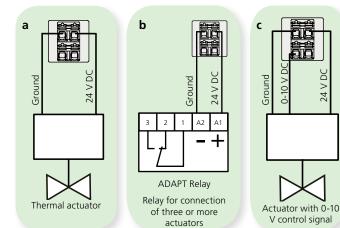

- Sensor Module Advanced (WISE SMA), (Optional)
- Sensor Module Basic (WISE SMB), (Optional)
- Valves and actuators for cooling
- Valves and actuators for heating
- Temp. sensor
- Condensation sensor

WISE Parasol Zenith, connection.

There are different types of actuators

- For connection of the thermal actuator such as Swegon's ٠ actuator ACTUATORc, see figure a.
- When connecting the relay for connection of three or more actuators, see figure b.
- When connecting of the actuator with 0-10 V control signal (NOTE! 24 V DC supply) see figure c.

LED - Explanation

Not connected "paired"

| | Colour | Туре |
|------------------------------------|--------|------------------------|
| Energized | White | Permanent |
| Selected in TuneWISE | White | Flashing, fast |
| Prepared to be added to the system | White | Flashing, slowly |
| To be added to the system | White | Flashing, fast for 5 s |

Connected "paired"

| | Colour | Туре |
|-----------------------------|---------------|--------------------|
| Normal operation | Green | Permanent |
| Restart | Blue | Permanent for 10 s |
| Initiation | Blue | Flashing |
| Boosted max. flow | Orange | Permanent |
| Boosted min. flow | Orange | Permanent |
| Boosted water flow | Violet | Permanent |
| Boosted water flow/air flow | Violet/Orange | Alternating |
| Comfort alarm | Red | Permanent |
| Function alarm | Red | Flashing |
| Emergency mode | Green/Red | Alternating |
| Test mode | Green/Orange | Alternating |

10

Use

Use TuneWISE for commissioning. Commissioning must be performed by qualified and trained WISE service engineers.

Use SuperWISE for settings, reading alarms, etc. refer to the documentation for SuperWISE II / SuperWISE II SC.

Trouble shooting

The product is not shown in the system:

- Make sure that the product is energized. (e.g. diode)
- Make sure that the product is paired.
- Make sure the product is in the right network.

The product shows incorrect/no air flow/pressure

- Make sure that the product is installed according to the recommended distance.
- Check that there is air flow/pressure.
- Check that the measuring tube is mounted correctly.
- Check that the measuring tube is undamaged.

The product does not regulate the air flow/pressure

- Check that the motor has not become detached from the damper spindle.
- Check that the motor works by turning the motor's release button, turn the damper spindle, release the knob and then see whether the motor starts to move.

The product shows incorrect/no temperature

- Make sure the temperature sensor is not missing.
- Make sure that the temperature sensor does not hang outside the product.
- Check that the temperature sensor is connected to the right input.

The product shows incorrect/no VOC/CO2

- Make sure the VOC/CO2 sensor (WISE SMA) is not missing.
- Check that the VOC/CO2 sensor is connected to the right input.

Cleaning

Ideally the product should be cleaned twice a year by vacuuming the coil to remove loose dust. In fibre dense environments a more frequent interval is recommended.

A simple visual inspection of connections is recommended when cleaning.

Avoid aggressive cleaning agents which may harm painted surfaces. Normally a mild soap or alcohol solution is fully adequate for cleaning. See also the maintenance section in this instructions for use.

Cleaning of electrical components

- If needed, use a dry cloth to clean the components.
- Never use water, detergent and cleaning solvent or a vacuum cleaner.

Service/maintenance

- In connection with a service, mandatory ventilation inspection or cleaning of the ventilation system, check that the general condition of the products looks ok. Pay particular attention to the suspension, cables and that they sit firmly in place.
- It is not permissible to open or repair electrical components.
- If you suspect that the product or a component is defective, please contact Swegon.
- A defective product or component must be replaced by an original spare part from Swegon.

Materials and surface treatment

Sheet parts are made of galvanised sheet steel (Z275) and pre-painted sheet SS-EN 10143+10346 - DX52D + ZA95, NCS S 0500-N gloss 30+/-6%.

Disposal

Waste must be handled according to local regulations.

Product warranty

The product warranty or service agreement will not be in effect/will not be extended if: (1) The product is repaired, modified or changed, unless such repair, modification or change has been approved by Swegon AB; or (2) the serial number on the product has been made illegible or is missing.

Swegon^ø

WISE Adriatic

Technical data

| Max. radio frequency output: | 50 mW |
|--------------------------------|--------------------------------------|
| Frequency band: | 2.45 GHz, IMS band (24002483 MHz) |
| Temperature sensor: | 0 - 50°C ± -0.5°C |
| Dynamic pressure sensor: | 0 - 300 Pa |
| With WISE SMA | |
| VOC sensor | 450 - 2000 ppm |
| RH sensor: | 0 - 100 RH% |
| IP class: | IP20 |
| Running time open/close (90°): | 120 s |
| Ambient temperature | |
| Operation: | 0 – 50°C |
| Storage: | -20 – +50°C |
| RH: | 10 - 95% |
| | (non condensing) |
| CE marking: | 2006/42/EC (MD) |
| | 2014/53/EU (RED) |
| | 2011/65/EU (RoHS2) |

Electrical data

| Power supply: | 24V AC ±15% 50 - 60Hz |
|-------------------------|---|
| Connections pipe dim. | |
| Power: | Screw terminal max. 2.5mm ² |
| Valve actuator: | Push-in spring force connections, max. 1.5 mm ² |
| Max. power consumption: | See table below |

| WISE Parasol Zenith in standard design: | VA / unit | Standard VA total |
|---|--------------|----------------------|
| WISE CU | 2.3 | 43 |
| Damper motor (315C) | 2 | 4.5 |

| Option: | | VA / unit | |
|-----------------|-----|-----------|-----|
| Valve actuator, | x 1 | x 2 | х З |
| ACTUATORC | 6 | 12 | 18* |
| WISE SMA | 0.8 | | |
| WISE SMB | 0.6 | | |

Example:

Example. WISE Adriatic in standard design with the following options: Actuator for cooling and heating as well as WISE SMA, gives a total power consumption of 4.3 + 6 + 0.8 = 11.1 VA *Valid for products with CU ver. 2, delivered from 01/10/2019

Declaration of Conformity

Swegon AB hereby affirms that

WISE Parasol Zenith with integrated radio, complies with the essential characteristic demands and relevant regulations specified in the following directives: 2006/42/EC (MD), 2014/53/EU (RED) and 2011/65/EU (ROHS2):

The following standards have been observed:

| EN ISO 12100:2010 | Safety of machinery - General principles for design - Risk assessment and risk mitigation |
|---|---|
| EN 60204-1:2006 | Safety of machinery - Electrical equipment of machines - Part 1: Generic standards |
| EN 60730-1:2011 | Automatic electrical control and control unit for household use - Part 1: Generic standards |
| EN 60730-2-14:2009 | Automatic electrical controls for household and similar use - Part 2 Particular requirements for electric actuators |
| IEC 60529:1992+A2:2013 | Degrees of protection provided by enclosures (IP code) |
| EN 61000-6-2:2007 | Electromagnetic compatibility (EMC). Generic standards. Immunity for industrial environments |
| EN 61000-6-3:2007 | Electromagnetic compatibility (EMC) - Generic standards - Emission standard for residential, commercial and light-industrial environments |
| EN 300 328 V1.9.2, V1.9.1, V1.8.1 | Electromagnetic compatibility and Radio spectrum Matters (ERM) - Wideband Transmission systems - Data transmission equipment operating in the 2.4 GHz ISM band and using spread spectrum modulation techniques |
| EN 60335-1:2012+A11:2014 EN 60335-2-30:2009+A11 EN 62233:2008 | Electric household appliances and similar appliances - Safety - Part 1: Generic standards |

Maintenance

Fold down design module

The unit is equipped with a pushbutton at either end of one of the long sides, for simple lowering of the design section and access to e.g. control equipment. When lowering, one long side is opened and the design section is suspended from the opposite long side.

Secure design module

When fastening the design module from an open position, raise the design section until you hear a click, at which point it is secured in the base module.
