

REACT V BMP

Variable flow damper – Belimo MP-Bus

QUICK FACTS

- Variable or constant flow regulation
- Can be mounted directly at bends and duct transitions/reductions (circular)
- Setting/reading of parameters via the hand-held terminal ZTH EU, PC-Tool or Belimo Assistant App
- Analogue control and MP-Bus control
- Can be easily anti-condensation insulated in the duct system
- Variants:
 - Circular connections: Ø100-630 mm
 - Rectangular connections: 200x200-1400x700 mm

REACT V BMP Size	FLOW RANGE					
		Min.		Max.*		
	l/s	m ³ /h	cfm	l/s	m ³ /h	cfm
100	5	18	11	58	209	123

Technical description

General

- Intended for flow regulation of comfort ventilation.
- Moist, cold and aggressive environments must be avoided.
- Can be installed in both supply and extract air systems.
- Pressure independent but recommended working range between minimum pressure drop of 10 Pa to 300 Pa over the damper.
- The minimum air flow must be considered during design.
- For good regulation, a minimum difference between V_{min} and V_{max} of 20% of the product's V_{nom} is recommended.

Design

- Integrated air flow sensor.
- Analogue control and MP-Bus control.

Circular design

- Connection: Ø100-630 mm.
- Always supplied with dust protection.
- Motor shelf with 25 mm spacer to facilitate condensation insulation of the duct system.
- A factory-insulated model available on request.

Rectangular design

- Connection 200x200-1400x700 mm.
- Other sizes are also available on request.

Functions

- Variable or constant flow regulation.
- Measurement of air flow.
- Setting and reading of parameters on the controller via the external hand-held terminal ZTH EU, PC-Tool or Belimo Assistant App.

Materials and surface treatment

- All sheet-metal parts are galvanized sheet steel (Z275).
- Measuring rods are aluminium.

Project design / Typical room

See separate documentation "REACT Belimo Description of functions & wiring diagram", available for download via www.swegon.com.

Maintenance

The product does not require any maintenance/service, except for any cleaning when necessary. See the separate Instructions for Use, available on www.swegon.com.

Environment

The Building Materials Declaration is available on www.swegon.com.

Accessories

REACT V COVER CIRCULAR	Cover panel for circular design in case of visible installation
FSR	Clamp for easy dismantling of a circular design for cleaning and inspection
ZTH EU	Hand-held terminal for setting of parameters on the actuator
ZIP-BT-NFC	Dongle for Bluetooth connection to Belimo Assistant App
DETECT Occupancy V110	Occupancy detector for wall and corner installation
DETECT Occupancy T360	Occupancy detector for ceiling installation
LUNA RC	Room controller for temperature regulation, with display
LUNA RC CO ₂	Room controller for temperature and CO ₂ regulation, with display
LUNA RE	Room controller for temperature regulation
DETECT IAQ	CO ₂ - and temperature controller
DETECT IAQ OCS	CO ₂ - and temperature controller that also detects occupancy
DETECT IAQ D	CO ₂ - and temperature controller for duct installation

Technical data

IP class:	IP54
Corrosivity class:	C3
Pressure class:	A
Leakage classes according to SS-EN 1751	
- Leakage class, casing:	C
- Leakage class circular damper, closed:	4
- Leakage class rectangular damper, closed:	3
Running times open/close (90°):	
5 Nm:	100 s
10 / 20 Nm:	150 s
Ambient temperature	
Operation:	0 – +50°C
Storage:	-20°C – +80°C
RH:	5 – 95% (non-condensing)
CE marking:	2006/42/EC (MD) 2014/30/EU (EMC) 2011/65/EU (RoHS2)

Electrical data

Power supply:	24 V AC/DC ±15% 50 - 60 Hz	
Fixed connection cable, 1000 mm with cable size.	4 x 0.75 mm ² <i>See figure 2 below.</i>	
Power consumption, for transformer rating:		
REACT V BMP 5 Nm	2.0 W	3.5 VA
REACT V BMP 10 Nm	3.0 W	5.0 VA
REACT V BMP 20 Nm	3.0 W	5.5 VA
<i>See torque in tables on pages 8 and 10.</i>		

Connection

1-2 – Supply voltage	24 V AC/DC
3 – Control signal (Y)	0..10/(2..10) V DC
5 – Actual value signal (U)	0..10/(2..10) V DC

Figure 2. Connection.

Sizing

Circular design

- Important! Increased air flow gives increased duct velocity and increased sound level.

Acoustic data

Sound power level

- The diagrams show the A-weighted sound power (L_{WA} -dB), as a function of the air flow and pressure drop across the damper.
- Correct L_{WA} with correction factor K_{ok} from the tables below to obtain the sound power levels for each octave band ($L_W = L_{WA} + K_{ok}$).

Correction factors for conversion to sound power in octave bands:

L_{WA} = Sound level with A-filter but without room attenuation in the sizing diagram for duct products.

K_{ok} = Correction factor in octave bands.

K_{trans} = Correction factor in octave bands for transmitted sound.

Sound power in octave bands

$$L_W = L_{WA} + K_{ok} \text{ [dB]}$$

Correction factor K_{ok}

Size	Mid-frequency (octave band) Hz							
	63	125	250	500	1000	2000	4000	8000
100	7	7	5	-1	-5	-10	-17	-22

Rectangular design

- Important! Increased air flow gives increased duct velocity and increased sound level.

Acoustic data

Sound power level

- The diagrams show the A-weighted sound power (L_{WA} -dB), as a function of the air flow and pressure drop across the damper.
- Correct L_{WA} with correction factor K_{ok} from the tables below to obtain the sound power levels for each octave band ($L_W=L_{WA}+K_k+K_{ok}$).

Sound power in octave bands

$$L_W = L_{WA} + K_k + K_{ok}$$

Correction factor K_{ok}

Size	Mid-frequency (octave band) Hz							
	63	125	250	500	1000	2000	4000	8000
All	7	3	1	0	-5	-14	-23	-22
Tol. ±	4	4	3	2	2	2	2	2

Correction factor K_k for the damper's face area

Correction factor – face area								
Area m ²	0.1	0.15	0.25	0.4	0.6	1.0	1.6	2.5
K_k	-3	-2	0	2	4	6	8	10

Sizing diagram

Velocity - Pressure drop - Sound level

- The data is for the sound created in ducts.
- Specified sound levels L_{WA} : 40, 50, 60 and 70 dB.
- Calculate the face velocity across the damper and read the sound data and pressure drop at an appropriate damper position.
- 100% corresponds to the damper being fully open.

^{*)}Vnom at 120 Pa in pressure reading.

*Installed according to the instructions.

Figure 3. Dimensions (mm), REACT V BMP circular. The damper can be installed at an optional angle.

Installation

- The product's air flow measurement requires a straight duct section as per the installation figures.
- In unfavourable conditions before or with disruption, the product's tolerances cannot be guaranteed.
- Installation is position independent.
- The product can be installed horizontally or vertically.
- Instructions for Use are supplied with the product on delivery, but can also be downloaded from www.swegon.com.

Straight duct section requirements

Figure 4. Straight duct section requirements in circular ducts, number of \varnothing before product:
 Image 1-5 require no straight duct section (image 3* illustrates a T piece with a cleaning hatch).
 Image 6 requires a straight duct section before the damper equivalent to $4 \times$ the diameter of the duct.

Straight duct section requirements in case of sound attenuator with baffle

Figure 5. Straight duct section requirements $3 \times \varnothing$ in case of sound attenuator with baffle or centre body.

Installation in the duct system

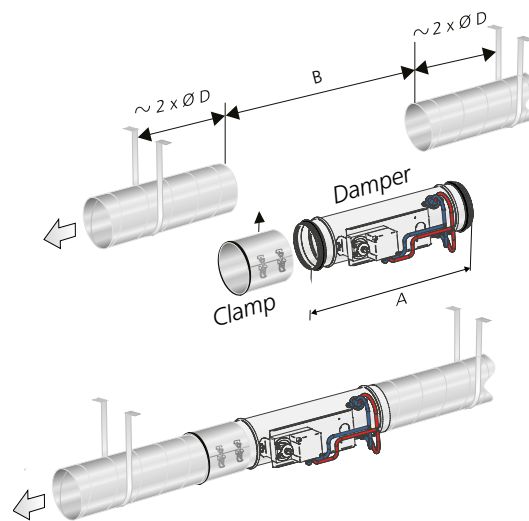

Figure 6. Installation in the duct system. The ducts must be firmly fixed to the frame of the building on each side of the product.

*Vnom at 120 Pa in pressure reading.

*Installed according to the instructions.

Figure 7. Dimensions (mm), REACT V BMP rectangular.

Installation

- The product’s air flow measurement requires a straight duct section as per the installation figures.
- In unfavourable conditions before or with disruption, the product’s tolerances cannot be guaranteed.
- Damper spindles must be installed horizontally.
- For rectangular ducts, the damper is always installed so that the controller/actuator is placed along the side of the duct.
- Instructions for Use are supplied with the product on delivery, but can also be downloaded from www.swegon.com.

Straight duct section requirements

Type of disruption	E (m ₂ =5%)	E (m ₂ =10%)
One 90° bend	E = 3 x B	E = 2 x B
T piece	E = 3 x B	E = 2 x B

Figure 8. Straight duct section requirements in rectangular ducts.

E = Straight duct section

B = Width of duct

H = Height of duct

Straight duct section requirements in case of sound attenuator with baffle

Figure 9. Straight duct section requirements 3 x B in case of sound attenuator with baffle. Applies to both supply and extract air.
